

2070 Health - Roadmap

4-week Roadmap plan

Initiative	What it is	Why it matters	What is needed	Measure success
Patient Profile Layer	Capture patient details, treatment stage, caregiver info, dietary restrictions, active products	Creates personalization foundation and helps tailor reminders/refills	Profile form, consent, Shopify customer mapping	Profile completion rate, conversion uplift, repeat purchase rate
Dose Tracking MVP	Users can create morning/afternoon/evening schedule for supplements/medicines, mark taken/skipped, and get WhatsApp/SMS reminders	Creates daily engagement after purchase and builds retention beyond reorder nudges	Dose fields, schedule logic, reminder system, taken/skipped tracking	Reminder opt-in rate, dose confirmation rate, 30-day engagement
Smart Refill Calendar	Estimate when product will finish based on pack size and dosage frequency	Makes reorder more intelligent than generic nudges	SKU quantity mapping, dosage frequency, refill prediction logic	Refill CTR, reorder conversion, repeat purchase uplift
Medicine/Supplement Cabinet	Dashboard of active products, dosage, start date, expected end date, refill status	Turns Everhope into a post-purchase utility, not just a store	Customer dashboard, order history, active routine data	Cabinet activation rate, monthly returning users, repeat order rate
Caregiver Mode MVP	Buyer can mark "buying for someone else" and share reminders/refill updates with caregiver	Oncology care is often managed by family members	Buyer-patient relationship field, caregiver WhatsApp opt-in, shared alerts	% caregiver-tagged orders, caregiver reorder rate

12-week Roadmap

Initiative	What it is	Why it matters	What is needed	Measure success
Prescription/Report Upload to Cart	User uploads Rx/report and system creates suggested products/tests	Converts clinical intent into commerce and	Upload flow, OCR/manual review, clinical	Upload-to-cart rate, upload-to-

Initiative	What it is	Why it matters	What is needed	Measure success
	or dosage schedule after review	reduces confusion	validation, cart creation logic	purchase conversion
Advanced Adherence Tracking	Adds adherence score, missed-dose history, weekly adherence summary, and habit streaks	Makes dose tracking measurable and keeps users engaged	Adherence logic, dashboard, weekly summary, notification triggers	Weekly active users, adherence score, repeat purchase rate
Side-Effect & Notes Logging	User logs symptoms/side effects after taking products or medicines	Helps build trust and creates patient insight beyond transactions	Notes field, symptom tags, timeline view, safety escalation rules	Log frequency, 30-day retention, support escalation rate
Caregiver Escalation Logic	If multiple doses are missed, caregiver gets an alert	Makes the platform useful for real patient care, especially elderly/oncology patients	Missed-dose rules, caregiver permissions, WhatsApp alert flow	Missed-dose recovery rate, caregiver engagement
Routine Builder	User can create/save a daily routine and buy the full routine as a cart	Increases AOV and makes products feel like a care plan	Routine UI, dosage schedule, cart bundling, saved routine	Routine creation rate, AOV uplift, routine reorder rate
Multi-Medicine Support	Supports complex regimens across multiple medicines/supplements with different timings and instructions	Important for oncology patients who may take multiple products daily	Multi-product schedule, timing rules, doctor instruction fields	Multi-product routine adoption, adherence rate

Long term goal:

Everhope support the patient across the full cancer journey — diagnosis, treatment, recovery, and post-recovery care.

The full patient journey we can own:

Stage	Patient Need	Everhope Opportunity
1. First hospital visit	Confusion, diagnosis anxiety	Patient onboarding + care navigator
2. Doctor consultation	Treatment plan clarity	Digital care plan summary
3. Lab tests	Reports, biomarkers, deficiencies	Lab booking + report interpretation

Stage	Patient Need	Everhope Opportunity
4. Medication/treatment	Chemo/radiation/surgery support	Medication + supplement routine
5. Daily care	Symptoms, side effects, nutrition	Tracking app + WhatsApp companion
6. Recovery	Strength, appetite, fatigue, immunity	Recovery protocols + products
7. Post-recovery	Recurrence anxiety, follow-ups	Survivorship care plan
8. Insurance/finance	Claim support, affordability	Insurance/financing assistance

The long-term flywheel could be:

1. Hospital refers patient
2. Patient is onboarded into Everhope care journey
3. Lab reports and treatment details create patient profile
4. Everhope recommends nutrition, supplements, medication support
5. Patient tracks daily routine and symptoms
6. Caregiver stays engaged
7. Reorders and follow-ups happen automatically
8. Outcome data improves recommendations
9. Hospitals see better patient support
