

2070 Health - Roadmap

4-week Roadmap plan

Initiative	What it is	Why it matters	What is needed	How to measure success
Dose Tracking + Reminder	User adds supplement/medicine schedule and receives WhatsApp/SMS reminders	Creates daily engagement and improves reorder predictability	Patient profile, dosage fields, reminder logic, WhatsApp/SMS integration	Reminder opt-in rate, reminder response rate, repeat purchase rate
Patient Profile	Store basic patient details: age, cancer type, treatment stage, caregiver details, active products	Makes the shopping experience personalized instead of generic	Profile fields, consent, Shopify customer mapping	% users completing profile, conversion uplift for profiled users
Smart Refill Calendar	Calculates when a product will run out based on quantity and dosage	Converts usage data into repeat orders	SKU quantity mapping, dosage frequency, refill date logic	Reorder conversion, refill reminder CTR
One-Click Repeat Order	User can reorder previous cart/product stack instantly	Reduces friction for repeat customers	Order history, reorder CTA, cart prefill	Repeat order rate, time to reorder
Product Usage Guide After Purchase	Post-purchase page with dosage timing, food timing, precautions, storage, refill date	Reduces anxiety and improves trust	Content template per SKU, order-triggered guide	Guide open rate, support query reduction
Guided Product Selector	Simple flow: cancer type → concern → recommendation	Helps users who do not know which product to buy	Decision tree, clinical rules, SKU tagging	Selector completion rate, selector-to-cart conversion

12-week Roadmap

Initiative	What it is	Why it matters	What is needed	How to measure success
Medicine/Supplement Cabinet	Dashboard of all active supplements, dosage, refill dates, past orders	Turns Everhope into the user's health-commerce home	Customer dashboard, order history, dosage tracker	Monthly active users, repeat purchase rate
Caregiver Mode	Caregiver can manage patient profile, reminders, orders, refill alerts	Cancer commerce is often managed by family members	Linked caregiver account, permissions, WhatsApp alerts	Caregiver adoption, reorder frequency
Report/Prescription Upload to Cart	User uploads prescription/lab report and gets suggested tests/supplements	Converts clinical intent into commerce	Upload flow, manual/AI extraction, clinical review logic	Upload-to-purchase conversion
Product Comparison Feature	Compare two supplements/tests by use case, ingredients, dosage, price, suitability	Reduces decision friction	Product attributes, comparison UI	Compare-to-cart conversion
Cancer-Type Personalized Storefront	Homepage/product listing changes based on selected cancer type or recovery need	Makes catalog more relevant	Cancer-type tagging, dynamic collections	PLP/PDP conversion uplift
Routine Builder	User creates a daily supplement routine and can buy the full routine as a cart	Increases AOV and retention	Routine UI, schedule logic, cart bundling	Routine creation rate, AOV uplift
Refill Subscription Lite	Instead of full subscription, user gets refill reminders with one-click checkout	Lower commitment than subscription	Refill logic, WhatsApp payment link, cart prefill	Refill conversion rate

Initiative	What it is	Why it matters	What is needed	How to measure success
Family Cart / Multi-Patient Cart	Buy for multiple patients/family members in one checkout	Useful for caregivers and chronic care families	Patient labels inside cart, saved profiles	Multi-patient order rate, AOV

Long term goal:

Everhope support the patient across the full cancer journey — diagnosis, treatment, recovery, and post-recovery care.

The full patient journey we can own:

Stage	Patient Need	Everhope Opportunity
1. First hospital visit	Confusion, diagnosis anxiety	Patient onboarding + care navigator
2. Doctor consultation	Treatment plan clarity	Digital care plan summary
3. Lab tests	Reports, biomarkers, deficiencies	Lab booking + report interpretation
4. Medication/treatment	Chemo/radiation/surgery support	Medication + supplement routine
5. Daily care	Symptoms, side effects, nutrition	Tracking app + WhatsApp companion
6. Recovery	Strength, appetite, fatigue, immunity	Recovery protocols + products
7. Post-recovery	Recurrence anxiety, follow-ups	Survivorship care plan
8. Insurance/finance	Claim support, affordability	Insurance/financing assistance

The long-term flywheel could be:

1. Hospital refers patient
2. Patient is onboarded into Everhope care journey
3. Lab reports and treatment details create patient profile
4. Everhope recommends nutrition, supplements, medication support
5. Patient tracks daily routine and symptoms
6. Caregiver stays engaged

7. Reorders and follow-ups happen automatically
8. Outcome data improves recommendations
9. Hospitals see better patient support
